

FIBA APPROVED EQUIPMENT GUIDE

FIBA
EQUIPMENT
& VENUE

**Dear Industry Stakeholders,**

We take great pleasure in sharing with you the FIBA Approved Equipment Guide.

The guide presents the member companies who, in cooperation with the FIBA Equipment & Venue Centre, deliver a high level of safety, quality and technology to our sport.

Each item of Approved Equipment has been tested and approved using ever-advancing testing procedures and standards. The FIBA Accredited Test Institutes provide expertise and consistency to ensure that the required standards are met. The use of Approved Equipment is recommended at all levels of basketball and is mandatory at elite level FIBA national team and club competitions.

With the advancement of 3x3 basketball, which is now an Olympic discipline, we are pleased to introduce the FIBA Approved 3x3 Equipment programme. The programme aims to increase the quantity and quality of top level 3x3 competition equipment and to raise the standard of outdoor playing equipment throughout the world.

This guide is for the benefit of venue operators, event organisers, the fans, and the basketball players – who deserve a high level of quality and safety. It also provides assistance to the National Federations, clubs, municipalities and governments who are involved in the building and refurbishment of basketball facilities.

The member companies who produce Approved Equipment are each presented on a page of the guide. We hope this guide offers useful information to all stakeholders who share our interest to create high quality and safe sporting infrastructures.

Andreas Zagklis
FIBA Secretary General

About the FIBA Equipment & Venue Centre

Founded in 1993, the FIBA Equipment & Venue Centre was born from the belief that an increase in the quantity and quality of worldwide sports premises would serve as a major catalyst for the growth and development of the sport of basketball. Today, the Equipment & Venue Centre has over 90 member companies who produce and supply equipment for basketball worldwide.

The Equipment & Venue Centre sets standards for basketball equipment and facilities, ensuring that they fulfil the strict requirements of high-level basketball competitions, and the safety standard required at all levels of indoor and outdoor basketball.

The Centre also offers consulting services for sports venue design and fitout in connection with the construction of new, and the refurbishment of existing, basketball facilities.

To meet the objective of attaining a high standard of quality, safety and technology, the Centre established the FIBA Approval Programme for Basketball Equipment – a global platform to find high-quality, tested and certified basketball equipment.

The 14 categories of Approved Equipment, including 4 categories designated to 3x3 basketball, are presented in this guide.

A **Gerflor** company

COMPANY PROFILE

Sport Court® products deliver the best combination of shock absorption, ball response, traction, and playability. Our in-house engineering team designs and manufactures each court with state-of-the-art materials. Independent labs found that our products protect athletes from overuse and stress injuries. Our dedication to quality allows you to spend your time teaching qualities like discipline, endurance, and fairness, instead of worrying about maintenance or player safety.

Sport Court surfaces are used at the highest levels of competition by leading sports associations around the world, including FIBA, the NCAA®, FIVB, and USA Volleyball and are backed by our 15-year warranty.

Truly Innovative Water-Based Wood Floor Care

- **Sport Kote® PC** 128SF
- **Sport Seal** 226SF
- **Sport Kote®** 222SF

www.sportkote.com

COMPANY PROFILE

With over 40 years of experience inventing brand new polymers, Essential Industries has become a world leader in polymer innovation and wood floor care technology.

Essential's Sport Kote® and Sport Kote® PC products are water-based, urethane wood finishes that require no sanding or screening. These MFMA-approved and UL-Classified finishes adhere to any sound gym floor coating. They are fast-drying (only 60 minutes under normal conditions), so you can get your athletes back on the floor THE NEXT DAY! They are also easily restored to a like-new gloss and can last for a year with proper maintenance.

Our wood floor care products are unmatched by the competition.

molten[®]
For the real game

COMPANY PROFILE

Molten Corporation was established in Hiroshima, Japan, in 1958 and has grown to become the world's largest ball company among those who develop, manufacture and distribute balls with a self-brand. Molten's top quality leather basketball has served as the official game ball for all the Olympic Games and the World Championships/ World Cups since 1982.

Molten developed a new FIBA official game ball BG 5000. It offers improved controllability with an authentic look and feel of a genuine leather. This was realized by changing the surface finish, printing method, as well as improving the internal structure of the ball.

Molten also develops basketball whistle "BLAZZA" and "DOLFIN B" whistles.

COMPANY PROFILE

SportIQ - The smart basketball revolution.

With the SIQ Basketball anybody can track and analyse all their shots through their SIQ app on their phone. SportIQs revolutionary shooter detection technology allows you to track your shots at solo practice, playing with friends at team practice, using just the SIQ ball. The SIQ app lets you analyse each shot by:

- Make / Miss;
- Accuracy (swish);
- Heatmap (without locationing system);
- Situation pass, dribble, relaxed and layups;
- Quickness of shot;
- Shooter detection.

The SIQ ball works with your phone or with a locationing system. For team inquiries contact sales@sportiq.xyz

3X3 BASKETBALLS

molten[®]
For the real game

COMPANY PROFILE

Molten Corporation was established in Hiroshima, Japan, in 1958 and has grown to become the world's largest ball company among those who develop, manufacture and distribute balls with a self-brand. Molten's top quality leather basketball has served as the official game ball for all the Olympic Games and the World Championships/ World Cups since 1982.

Molten developed a new FIBA official game ball BG 5000. It offers improved controllability with an authentic look and feel of a genuine leather. This was realized by changing the surface finish, printing method, as well as improving the internal structure of the ball. Molten also develops basketball whistle "BLAZZA" and "DOLFIN B" whistles.
