

3x3 Federation Ranking – Men

1 April 2014

The 3x3 Federation Ranking is the main criteria used to identify the teams qualified to the national-team based 3x3 Official Competitions. It is based on the 3x3 Individual World Ranking.

The 3x3 Individual World Ranking takes into account the number of points collected by players in the last 12 months. National Federations are ranked according to the aggregate points tallied by their Top 100 nationals in the 3x3 Individual World Ranking in the men's category, who have a confirmed 3x3planet.com account.

The 3x3 Federation Ranking not only rewards the elite performances of the players but also the 3x3 activity in the territory of each National Federation. The position in the 3x3 Federation Ranking is driven by the number of players and their playing frequency. The more events are organised the more likely players will accumulate points and increase the national federation's standing in the 3x3 Federation Ranking.

The 3x3 Federation Ranking will be published on a monthly basis on www.fiba.com/3x3. National Federations can check the most updated ranking at their convenience with their exclusive access to www.3x3planet.com, FIBA 3x3's online platform.
